SUMMARY

Software Engineering undergraduate focused on automation, web development, and cybersecurity. Hands-on experience developing modern applications using React, Node.js, JavaScript, and Python, as well as building automated workflows with n8n and API integrations.

Strong interest in cybersecurity, vulnerability analysis, and secure software development, constantly improving technical skills through real-world projects focused on productivity, performance, and user experience.

EXPERIENCE

Assaí Atacadista

Sep 2020 – Dec 2021

Apprentice Stock Clerk

Brazil

- Provided customer support and assisted with product organization and operational activities.
- Developed communication, teamwork, and problem-solving skills in a fast-paced environment.
- Responsible for shelf organization and inventory support.

PROJECTS

Intelligent WhatsApp Copilot

SaaS Project

- Developed an automation platform for WhatsApp customer service with voice command integration.
- Built a Full Stack architecture using React, Node.js, and PostgreSQL.
- Integrated STT/TTS modules for hands-free operation and automation.

Affiliate Automation with n8n

Automation

- Created an automated pipeline for tracking and distributing affiliate offers.
- Integrated external APIs, webhooks, and automation workflows using n8n and JavaScript.
- Designed a 24/7 workflow for automated content curation and delivery.

Brotar+

Mobile Application

- Developed a mobile application that helps local merchants create digital storefronts and expand customer reach.
- Worked on user research, UX/UI design, and functional prototyping.
- Technologies used: React Native, Supabase, and Figma.

Climatic Adventure

NASA Hackathon

- Developed an educational game focused on climate change awareness.
- Implemented gameplay mechanics using Godot Engine and GDScript.
- Project achieved high engagement and learning effectiveness among users.

EDUCATION

State University of Pará (UEPA)

2022 – 2026

Bachelor's Degree in Software Engineering

Brazil

- Focused on software development, systems architecture, automation, and information security.

CERTIFICATIONS	
Cisco Networking Academy <i>Introduction to Cybersecurity</i>	2025
Cisco Networking Academy <i>Endpoint Security</i>	2024
Cisco Networking Academy <i>Networking Basics</i>	2024

SKILLS	
Languages: JavaScript, Python, Java, C, C++, C#, PHP, Kotlin, Lua	
Frontend: React.js, React Native, HTML5, CSS3, Bootstrap, Responsive UI/UX	
Backend: Node.js, REST APIs, WebSockets, PostgreSQL, MySQL, SQL Server	
Automation & AI: n8n, Webhooks, API Integration, Automated Workflows	
Cybersecurity: Kali Linux, Metasploit, Vulnerability Analysis, Endpoint Security	
Tools: Git, GitHub, Docker, Postman, Figma, Trello, Jira, Notion, VirtualBox	
Languages Spoken: Intermediate English, Basic Spanish
